

Cleaning Maps & Analytics

for K-12 School Districts

CrowdComfort

Improve Custodial Operations and Cleaning Quality with Cleaning Maps

CrowdComfort partners with K-12 School Districts to provide real-time insight into cleaning operations across the school district. This enables some of the largest school districts in the US to improve efficiency, save money, elevate cleaning quality and enhance learning outcomes every day in their schools and buildings.

Real-time cleaning analytics by time, school building and location

Complete compliance documentation for evolving state and federal regulations

All cleaning activities tracked by individual location for each school and campus

Training and implementation in less than 30 days across all stakeholders

Multi-vendor support with complete training for internal and external cleaning crews

Full analytics reporting by location, building, time, staff and compliance

Cleaning Maps & Analytics

for K-12 School Districts

CrowdComfort

Improving Learning Outcomes with Cleaner Schools and Cost Efficient Operations

Improved cleaning performance with full transparency

- Every cleaning by location (classroom, bathroom, hallway, office, etc.) is validated digitally to make sure they are cleaned every day
- Managers can see in real-time areas where cleaning was missed for quick resolution

34%

increase in daily
cleaning
compliance

Cost & operational savings in your budget

- Real-time and historical data to better allocate resources and staff
- Team performance validation to reward and retain top performers and up-level lower performers
- Time savings for managers with better oversight of remote teams and need for substitutes

5-10%

cost savings on
annual custodial
spend

Improve cleaning quality

- Ability to leverage solution with internal team and external vendors to track all cleaning audits
- Full flexibility to utilize mobile solution to any schedule and APPA scoring criteria
- Improved cleaning performance with cleaning validation program expectations

24%

improvement in
overall APPA
cleaning quality
